

Educators' Conversation Points of Interest: 2nd Talk

- Give students various project options so that they can select the project that suits their lifestyle best.
- Using metals based tools and materials isn't feasible for many students, so consider not making it a requirement/not putting emphasis on it.
- Check in with your union about the situation.
- Curriculum ideas:
 - Pick a piece of art from a museum and make a jewelry piece responding to it with alternative materials found at home. This includes a research component.
 - Found object chain making project. Find items at home and link them together using any means.
 - Reuse or upcycle materials for projects.
 - Focus on drafting techniques. Ask for multiple views of a piece focused on line and color.
- Ask students to take a picture of their new "workspace".
- Consider writing a letter to your students parents.
- SNAG will put together a list of people who would be willing to do virtual talks with students.
- Consider trading demos with other teachers for your students.
